

KMSPico is the activator used to activate Microsoft products, such as Windows and Office. It's a completely virus- and malware-free activator, trusted by many people.

I personally use it for Windows activation. This amazing activator works offline and is very easy to use.

[Download](#)

If you can't get the premium features of Windows for free, KMSPico is a very useful tool for enabling Windows and enjoying these features for free with its help.

Download "KMSPico.zip"

Software developed by TeamDaz is well-respected; they've also created other KMS tools like KMSAuto that work automatically and serve us well.

So, if anyone is having trouble activating Windows, simply follow this easy guide to learn how to do it. You'll also find the download link for your Windows 10 product key .

What is KMSPico?

KMSPico is used to validate pirated versions of Microsoft Windows. However, Microsoft presents this KMS technology for mutual benefit, without exposing it.

What is KMSPico?

Then you can say that these keys are published by the same team for public use.

KMSPico is also the software for these technologies that doesn't violate Microsoft's rules. It's like a local server that allows all machines to use KMS technology.

Not only does it help you activate the Windows operating system, but it also helps you activate MS Office, which is also a Microsoft product.

You know that new versions of MS Office need to be activated to use all their features. They come with a trial period. When the trial ends, you need to activate it to use it again. That's why this activator is also useful for activating it.

How KMSPico works

To understand the concept of KMSPico, you first need to understand how KMS works. We're using a Microsoft example so you can learn correctly.

As you know, Microsoft works with many small and large companies. Therefore, people at those companies have the problem of verifying the Windows or other products they are using.

To resolve this issue, Microsoft assigns a Key Management Server (KMS). This way, users don't need to enter their Windows product key to activate Windows. Instead, they go through the KMS server, and it activates their Microsoft products.

In this way, Microsoft achieved activation of volume-licensed products. Now, all companies use the KMS server instead of purchasing a separate copy of Windows for each system.

It also works on the same principle. It connects you to the KMS server and shows your windows that you are part of the KMS server.

What KMS Pico does

What KMS Pico does

When you purchase a copy of a Windows or Microsoft product, you will receive a trial version of that product. Some of these trials consist of product keys; others come with the trial versions.

Trial versions are limited to approximately 30 days. When the trial expires, you will need to activate the product to continue using it.

When the trial version expires, you can no longer use some Windows or MS Office features. In this case, you need an activator to use the product permanently.

KMS Pico is an example of such software that helps you activate Microsoft products so you can use them for the rest of your life for free.

There are many other tools available online that guarantee activation. However, most of these activators contain Trojans and malware that can damage your computer.

SUPPORTED PRODUCTS

This is the best activator because it not only activates Windows but also Office. Here is a list of all the products that Activator supports:

Windows 11

Windows 10

Windows 8.1

Windows 7

Office 2016

Office 2013

Office 2010

Office 2007

We will continue to update it if we find another compatible product or if we find new information about the activator.

Download KMSpico

Downloading KMSPico is easy. I'll provide a direct link where you can easily download it without any problems.

Download "KMSpico.zip"

Let's now look at the steps on how to download.

First, click the download button above.

You will then be redirected to our download page .

There you can see an available download button .

Click on that download button and wait a few seconds .

Now it will ask you where you want to save it. Choose your desired location and click Download Now.

The download will take a few minutes. (It depends on your internet speed).

You will get a zip file, extract that file, and it will ask you for a password.

You can find the password on the download page.

That's it now that you've successfully downloaded it to your computer. Now, if you don't know how to install and activate Windows, you can follow my installation guide.

HOW TO INSTALL

As you read through all the above information about the tool, here is a complete guide on how you can download and install the Windows activator.

Follow these steps to enjoy fully activated Windows and MS Office for life. It's very easy to install and use an activator.

First, you need to disable your firewall and antivirus (don't worry, it's not a Trojan or any virus. The antivirus blocks it because they know this will activate Windows :D).

Temporarily disable antivirus protection

If you are using Windows 10 , follow these steps to pause antivirus protection.

We open the Start Menu and type "antivirus".

We click on the " Antivirus and threat protection " option.

KMS peak antivirus and threat protection

We go to where it says " Antivirus and threat protection settings ", specifically to " Manage settings ".

Antivirus and threat protection settings

Within this menu, we deactivate the " Real-time protection " option.

Real-time protection

In Windows 11 Defender, it's disabled differently. Read how on this page .

After these steps, now download KMSPico from our website.

If you find any broken or unavailable links, please let us know so we can update them as soon as possible. Alternatively, simply look for another link.

After successfully downloading the KMSPico activator, extract it using WinRAR . The password to extract is " windows ".

-> Instructions for extracting <-

Now locate KMSELDI.exe and double-click on it to open it.

Run it anyway if it requests administrative privileges.

A new window will now appear and you will see a red button.

KMSPico Home

Simply click on that red button and it will only take a few seconds to complete the activation.

When it is complete, you will hear a voice saying " Program complete !"

KMSPico Final

That's it, you have now successfully activated Windows.

To activate MS Office, first open any of its programs, such as Microsoft Excel or Word. Then simply follow the steps above to activate it. Once completed, simply restart your computer and check if Windows is activated.

To verify your activation, go to the activation settings on your computer.

Windows 10 is activated

Now you will use all the features of Microsoft Windows and Microsoft Office for life.

How to activate Windows 10

Key feature

Strengths and Weaknesses

KMSPico offers many advantages over other activators. Here are some key points about this tool that you can compare with other activators if you wish.

It takes up less space on your PC. KMSPico only takes up 5 MB on your computer.

Access the public system.

It is a virus and malware free tool.

It is safe and easy to use. This tool does not collect your personal data.

This supports multiple languages. It's good for others who don't speak English.

It's a free tool that you can use for life. It won't cost you a penny.

When it comes to downsides to this tool, we can't find any. Because it's a free tool and malware-free. What more could we need?

How to remove KMS Peak from the computer

This is a simple guide that also helps you uninstall it from your computer.

Simply follow these steps to learn how it works.

Uninstall it using "Add or Remove Programs".

Remove KMSPico from Google Chrome and Firefox

By permanently deleting the log files.

Here is a detailed guide on how to uninstall KMSPico . Read it carefully to avoid mistakes. If you don't understand any step, contact us by filling out the contact form. We will help you uninstall it.

Frequently Asked Questions (FAQs)

As we all know, it's a type of illegal tool because pirating any software is illegal. That's why many people ask questions before trying to install it.

Here are some frequently asked questions that everyone wants answered. Simply read through these FAQs, and if you have any other questions, ask them in the comments or contact us.

We'll also add it here if we find it useful for others. 😊

1) Does this tool steal my bank account details or other personal information?

Collecting information without knowing the rightful owner is illegal. This tool does not collect your personal data stored on your computer.

You can even ask about this on Quora or any other forum. Nobody said this would steal my data. So feel free to use it.

2) Do we need to pay for kilometers at any stage?

No, you don't need to pay KMS a single cent. It's completely free and will remain free for life. Like other activation claims, they start out free, but after a few months, they ask for money. KMSPico isn't like that. I've been using it for two years, and it's never asked me for money.

3) Is it true that my Windows will be flagged or prompted for activation again if I previously used KMSPico?

These are just rumors. First, you need to understand that activation is completely free and will remain so.

Another point is that people who say their Windows will be flagged should understand that KMSPico doesn't use any of the keys itself. It uses genuine Microsoft keys to activate its product.

4) Is KMSPico safe to use?

Yes, 100% safe and secure to use. It contains no malware or viruses.

5) Is it permanent or will my windows automatically deactivate after a while?

Of course, it activates your Windows or Office permanently and won't deactivate it after a while. You can use it until you install new Windows.

6) Do I need an internet connection to use it?

I've already discussed that above. It doesn't need an internet connection; this works completely offline.

7) It shows that Windows is activated but I still see that watermark that says "Your Windows is not genuine"?

Well, it's not a big deal, so don't worry about it. You just need to restart your computer from the Start menu by clicking the down arrow next to Shut down and then clicking Restart . When you restart into Windows, you'll notice there's no watermark there.

8) Where can I find log files?

You can find log files by going to My Computer > Local Disk (C) > Program Files > KMSPico > Logs.

Conclusion

As you read all about this KMSpico Activator, you'll find it includes its installation program, Windows and Office activation, and much more.

But if you still have any questions, please don't hesitate to ask. You can contact us by filling out the contact form or by email. You can even leave a comment below. We'll get back to you as soon as possible.
